Investment & Financial Concerns

We need to be able to understand your attitude to risk in relation to potential returns in order to make appropriate recommendations. Put simply, risk is the extent to which you are willing to expose your initial investment to possible losses for the advantage of greater possible gains.

Generally speaking, the higher the potential return, the higher the potential risk. For example, shares and property give you a potentially higher return over a longer period, but have higher risk. Investments which pay you interest only have a low risk, but usually a lower return over a longer period. Having a mixture of these investments should give you a medium risk and return over the long term. **In order to determine the type of portfolio that will best suit your needs, we have provided you with a separate risk profile questionnaire to determine your personal risk profile.**

Risk profile based on the questionnaire provided is:
